Education

Dwarkadas J. Sanghvi College of Engineering, B.Tech in Information Technology 2022 – 2026

- GPA: 9.1/10.0
- **Coursework:** Probability & Statistics, Data Structures, Operating Systems, Databases

Experience

Data Analytics Intern, Cognifyz Technologies - Mumbai, India May 2025 – July 2025

- Analyzed 10,000+ customer and transaction records using **Pandas & NumPy** to identify behavioral patterns, customer segments, and business opportunities.
- Built automated data pipelines for cleaning and aggregation of raw business data, reducing manual reporting effort by 40%.
- Designed interactive dashboards and KPI reports in **Excel, Tableau** to track operational performance.
- Performed exploratory data analysis to generate actionable recommendations for business stakeholders.

Projects

Quantitative Asset Management & Risk Analysis System | *Python, Pandas, Numpy, REST APIs*

- Engineered a quantitative investment platform integrating **real-time market feeds** via yfinance to track asset performance and volatility for 50+ users.
- Implemented **ARMA and Prophet models** to forecast asset prices, successfully modeling risk metrics thus aiding in **portfolio optimization** & investment strategy formulation.
- Generated **automated performance reports** for users, simulating a stakeholder reporting mechanism to visualize Profit & Loss scenarios.

TacticGen AI — Football Tactical Intelligence Platform | *Python, FastAPI, D3.js, pandas*

- Executed an end-to-end data pipeline ingesting raw match events from **StatsBomb and API-Football**, computing 10+ tactical metrics across 10 matches per opponent.
- Applied **K-Means clustering** on positional data to profile opponent playing styles and surface weak zones.
- Engineered a grounded LLM layer (Anthropic API) that feeds structured opponent JSON as context to generate data-cited tactical recommendations.

Coding Performance Analytics Platform | *Node.js, React, MongoDB*

- Architected a platform that aggregates coding activity data from multiple platforms through **automated API synchronization**.
- Processed and analyzed user performance metrics including problem-solving volume, difficulty distribution, and consistency trends.
- Optimized **database queries and backend workflows** to support efficient reporting for concurrent users.

Technologies

Programming Languages: Python, SQL, Java, C++

Data Analytics & Visualization: Pandas, NumPy, Excel, Power BI, Tableau, Matplotlib

Databases: MongoDB, MySQL

Methodologies & Tools: Excel, Tableau, Agile, Scrum, Git, Postman

Achievements and Certifications

Competitive Programming:

- LeetCode – 1669 Rating | Solved problems focusing on data structures & algorithms | *Profile*
- CodeChef – 3* Rated | Honed ability to develop optimized algorithms under strict time constraints | *Profile*
- Codeforces – Pupil (Max Rating - 1325) | Top 5000 in India Among 100k+ | *Profile*
- CodeBounty 2024 – Runner-Up | Led team of 3 to develop winning solution among 50+ competing teams

Publications:

- FinFlow: Enhancing Portfolio Performance Through Risk Optimization | *View Publication*
